

PEDZ TRAINING TEST B – HUGS TAG

Note: Quiz assumes use of a Hugs (not Pedz) tag

Name: _____ **Date:** _____

- T or F** When a patient leaves the hospital, it is necessary to discharge the Hugs tag from the system (at the PC) before it is removed from the patient.
- T or F** The Hugs tag must be removed before the patient takes a bath or shower.
- T or F** The Hugs tag can only be applied to the patient’s wrist.
- T or F** The Hugs tag should always be removed before the patient leaves the safe area.
- T or F** A “heartbeat” is sent by the Hugs tag to ensure that it is working properly.
- T or F** The Hugs tag can be soaked for cleaning.
- T or F** It is OK to use scissors to cut the Hugs band.
- T or F** The Pedz System should be explained to the patient’s family.
- T or F** If a Hugs tag is too tight, and the band needs to be changed, you must discharge the tag and get both a new tag and a new band.

How tight should a Hugs tag be?

How often should you assess the Hugs tag?

When is the “Transport” function used?

When will a “Tamper Alarm” sound?
